

CAUTION

- For electrical connections, use cables of appropriate cross-section: from 6 mm².
- In case of a **long stay**, it is advisable to disconnect the negative cable from the device to completely neutralize any residual consumption that may inadvertently discharge the leisure battery.

No PIN	CONNECTION
1	Display Connection
2	Secondary connection (for future connections)
3	Solar Panel Negative poles
4	Batteries Negative poles
5	Solar Panel 1 Positive pole
6	Solar Panel 2 Positive pole
7	Leisure battery Positive pole (B1)
8	Starting battery Positive pole (B2)
9	Dip Switch - Charging curve selection
10	Temperature sensor connection for B1 (optional)
